A. **Water is Used Under:** Riparian claim ☒ Pre-1914 right _____ Other (explain): _____

B. **Year of First Use:** (Please provide if missing above) **1960 ?**

C. **Amount of Use:** Enter the amount (or the approximate amount) of water used each month, using the table below.

Amounts below are in: Gallons _____ Million Gallons (MG) _____ Acre-feet (AF) _____ Other **Not Measuring**

Year	Jan	Feb	Mar	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec	Total Annual
2004			✓	✓	✓	✓	✓	✓	✓	✓			
2005			✓	✓	✓	✓	✓	✓	✓	✓			
2006			✓	✓	✓	✓	✓	✓	✓	✓			

D. **Purpose of Use** - Specify number of acres irrigated, stock watered, persons served, etc.

Irrigation **1/3 ?** acres; Stockwatering _____; Domestic _____

Other (specify) **Garden, Lawn, Fruit Trees, Shrubs**

E. **Changes in Method of Diversion** - Describe any changes in your project since your previous statement was filed.
(New pump, enlarged diversion dam, location of diversion, etc.)
NONE

F. Please answer only those questions below which are applicable to your project.

1. Conservation of water

a. Are you now employing water conservation efforts? YES ☒ NO ☐
Describe any water conservation efforts you have initiated: **water on a timer, some drip irrigation**

b. If you are claiming credit for water conservation under section 1011 of the Water Code for your claimed pre-1914 appropriative right, please show the amount of water conserved:

Reduction in Diversions:

Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

Reduction in consumptive use:

Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

I have data to support the above surface water use reductions due to conservation efforts. YES _____ NO _____

Feb 15 2007

2. Water quality and wastewater reclamation

- a. Are you now or have you been using reclaimed water from a wastewater treatment facility, desalination facility or water polluted by waste to a degree, which unreasonably affects such water for other beneficial uses? YES ____ NO X.
- b. If you are claiming credit due to the substitution of reclaimed water, desalinated water or polluted water in lieu of a claimed pre-1914 appropriative right under section 1010 of the Water Code, please show amounts of reduced diversions and amounts of substitute water supply used:

Amount of reduced diversion:

Year ____ (AF/MG) Year ____ (AF/MG) Year ____ (AF/MG)

State the type of substitute water supply: _____

Amount of substitute water supply used:

Year ____ (AF/MG) Year ____ (AF/MG) Year ____ (AF/MG)

I have data to support the above surface water use reductions due to the use of a substitute water supply. YES ____ NO ____.

3. Conjunctive use of surface water and groundwater

- a. Are you now using groundwater in lieu of surface water? YES ____ NO X.
- b. If you are claiming credit due to the substitution of groundwater for a claimed pre-1914 appropriative right under section 1011.5 of the Water Code, please show the amounts of groundwater used:

Year ____ (AF/MG) Year ____ (AF/MG) Year ____ (AF/MG)

I have data to support the above surface water use reductions due to the use of groundwater. YES ____ NO ____.

I understand that it may be necessary to document the water savings claimed in "F" above if credit under Water Code sections 1010 and 1011 is sought in the future.

I declare that the information in this report is true to the best of my knowledge and belief.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

Weaverville, California
December 11, 1987

U.S. Forestry Department
Weaverville, California District

ATTN: Forester Dean Price

In regards to the closing of the old Water Co. diversion ditch on the upper reaches of East Weaver Creek.

I wish to state a few reasons against closure of the ditch at this time.

1. I do not feel that an amount of water flow is being diverted that causes any unwarranted stress to the fish habitat.
- 2.. At least one family has the ditch as their only source of domestic water: and this family has been given a permit to remain on the land in perpetuity.
- 3.. The diversion point is not unsightly to the occupants of the U.S. Forestry camp ground directly across the creek..

I am in complete agreement with the wants of the U.S. Forestry, the Fish and Wildlife Service and the California Fish and Game Dept. to preserve and improve the natural habitat. To further this aim, I believe and personally insist, that diversion ditches be treated in the same manner. IE: Equal pressure being applied to all such diversion points and the possibility of closing them off.

If the REAL reason the Fish and Game are concerned about this ditch being a deterrant to the fish nursery, then why isn't any ditch in Trinity County in the same category. Therefore to declare a closure of all ditches from all natural waterflows.

The ditch was in effect 22 years ago when we bought our place and we have answered all queries from the State Water Resources Board.. True, during dry seasons, the creek is quite low, but the same applies to all water-ways. We use a fine mesh screen on our single hose from the ditch and do not feel we disturb any fish that may be there..

We do have riparian rights to the creek water, but choose to use the ditch as it is more convenient. We use the water only for garden, lawn and trees. We use the City water system for domestic use.

Very Sincerely,

Wayne C. Lewis

22 JAN. 1988

Wayne C. Lewis
P.O. Box 1477
Weaverville, Ca. 96093

Dear Mr. Lewis

Thank you for your letter concerning the use of the Howe Ditch. We were contacted by the California State Fish and Game biologist regarding the entry of fish in the Howe ditch system. Mr. Dave Hoopaugh, the biologist informed Dean Price and I that small fish were entering the ditch and being trapped therein. He requested that we close the ditch or have a fish screen installed to prevent the entry of fish.

We realize that the ditch has been used historically for domestic and irrigation purposes by adjacent property owners. However, we have no record that the diversion was in fact ever approved as a legitimate water use from East Weaver Creek. Therefore, we could not install a fish screen or approve the installation of one unless the diversion was officially approved. We are also aware that one family uses the ditch as their sole domestic water source and closing this ditch will definitely be a hardship. We plan to speak with the property owners in the near future.

Because of the liability involved we could not issue a permit for the diversion as it now exists. An open ditch line above private property presents a hazard since a break in the ditch could cause significant damage.

There may be other ditches on the Forest that present similar problems and they would be addressed if brought to our attention by the State Fish and Game Department. If you would like to discuss this issue in more detail feel free to stop by the Weaverville Ranger District Office.

Sincerely,

Jack Holcomb
